

TAs—Supporting EAL Students in Secondary Science Lessons

Hounslow Language Service Ltd

Wednesday 9th November 2022
Afternoon 1.00-3.30pm
Online Live Webinar

This is a session on strategies to develop the literacy skills of EAL learners who are at different levels in their ability to use English. Changes to the science curriculum in recent years has meant a greater emphasis on communication and language skills as students mediate their understanding of scientific concepts.

In this session we will explore the concept of 'scientific literacy' and look at how we can help develop the language and literacy skills of EAL learners in science classrooms. There will be a focus on tried and tested strategies that have worked in a range of schools.

This course is suitable for all staff working in science classrooms.

Cost: Individuals £90 + VAT
- only 20 places available

For whole school bookings
